

Study: Multicenter evaluation of survival and toxicity in hepatocellular carcinoma patients following radioembolization treatment

Interventional radiologist <u>Dr. Justin Lee</u> of RP contributed to a study on the survival and toxicity in hepatocellular carcinoma patients in a multicenter, real-world data registry using transarterial radioembolization with resin microspheres. The study was published in the Journal of Vascular and Interventional Radiology (JVIR).

Read "Multicenter Evaluation of Survival and Toxicities of Hepatocellular Carcinoma following Radioembolization: Analysis of the RESiN Registry" on the JVIR website.
