Radiology Partners Completes Acquisition of Everlight Radiology

Combination creates a global leader in teleradiology, extending 24/7/365 subspecialty coverage for hospitals, health systems and imaging providers across the United Kingdom, Ireland, Australia, New Zealand and South Africa

NASHVILLE, Tenn. and LONDON – November 24, 2026 – Radiology Partners, Inc. ("RP") today announced it has completed its previously announced acquisition of Everlight Radiology ("Everlight"), a leading international teleradiology provider serving hospitals, health systems and imaging centers across the United Kingdom, Ireland, Australia, New Zealand and South Africa. The transaction, first announced on August 25, 2026, closed today following receipt of required regulatory clearances and satisfaction of customary closing conditions. Financial terms were not disclosed.

Everlight now operates as part of RP's global teleradiology business, alongside RP Clinical Services' vRad unit, the largest teleradiology platform in the U.S. The combination brings together Everlight's international radiologist network and vRad's U.S. teleradiology capabilities, expanding RP's ability to support hospitals, health systems and imaging providers with 24/7/365 coverage across major international markets.

Each organization will continue to serve the markets and clients it serves today, with radiologists interpreting exams

from facilities where they are licensed and credentialed. RP and Everlight will share technology and clinical standards so clients in every market can benefit from tools and quality standards proven across the businesses.

Rothschild & Co. and Barclays acted as financial advisors to Radiology Partners, and Jones Day, Kirkland & Ellis and Sidley Austin LLP served as its legal counsel.

About Radiology Partners, Inc.
